NOTICE TO INVENTORS

It should be clearly understood that a Disclosure Document is not a patent application, nor will its receipt date in any way become the effective filing date of a later filed patent application. A Disclosure Document may be relied upon only as evidence of conception of an invention and a patent application should be diligently filed if patent protection is desired.

Your Disclosure Document will be retained for two years after the date it was received by the Patent and Trademark Office (PTO) and will be destroyed thereafter unless it is referred to in a related patent application filed within the two-year period. The Disclosure Document may be referred to by way of a letter of transmittal in a new patent application or by a separate letter filed in a pending application. Unless it is desired to have the PTO retain the Disclosure Document beyond the two-year period, it is not required that it be referred to in the patent application.

The two-year retention period should not be considered to be a "grace period" during which the inventor can wait to file his/her patent application without possible loss of benefits. It must be recognized that in establishing priority of invention an affidavit or testimony referring to a Disclosure Document must usually also establish diligence in completing the invention or in filing the patent application since the filing of the Disclosure Document.

If you are not familiar with what is considered to be "diligence in completing the invention" or "reduction to practice" under the patent law or if you have other questions about patent matters, you are advised to consult with an attorney or agent registered to practice before the PTO. The publication, *Attorneys and Agents Registered to Practice Before the United States Patent and Trademark Office*, is available from the Superintendent of Documents, Washington, DC 20402. Patent attorneys and agents are also listed in the telephone directory of most major cities. Also, many large cities have associations of patent attorneys which may be consulted.

You are also reminded that any public use or sale in the United States or publication of your invention anywhere in the world more than one year prior to the filing of a patent application on that invention will prohibit the granting of a patent on it.

Disclosures of inventions which have been understood and witnessed by persons and/or notarized are other examples of evidence which may also be used to establish priority.

There is a nationwide network of Patent and Trademark Depository Libraries (PTDLs), which have collections of patents and patent-related reference materials available to the public, including automated access to PTO databases. Publications such as *General Information Concerning Patents* are available at the PTDLs, as well as the PTO's Web site at www.uspto.gov. To find out the location of the PTDL closest to you, please consult the complete listing of all PTDLs that appears on the PTO's Web site or in every issue of the *Official Gazette*, or call the PTO's General Information Services at 800-PTO-9199 (800-786-9199) or 703-308-HELP (703-308-4357). To ensure assistance from a PTDL staff member, you may wish to contact a PTDL prior to visiting to learn about its collections, services, and hours.

Burden Hour Statement: This collection of information is used by the public to file (and by the PTO to process) Disclosure Document Deposit Requests. Confidentiality is governed by 35 USC 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed Disclosure Document Deposit Request to the PTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, Washington, D.C. 20231. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Assistant Commissioner for Patents, Washington, D.C. 20231.

① Describe your product / Idea =

People lose their keys & gadgets every day. This invention would allow people (including handicapped people) to find several components in their home by means of a pushed page button. A Light Emitting Diode (LED) in cooperation with a speaker or buzzer would allow everything to be found when people are always in a rush. (Same as telephone page find.)

② Explain the product / Idea's function(s) =

By simply pushing a page button stationary on the wall, (small box with page) people will remotely control be able to find keys, cell phones, purses, wallets etc... in their home or out in their car in a timely manner in today's busy world.

③ If this is an improvement on an existing product, list the benefits.

This is a new idea!

④ List The product / Idea's benefits and unique qualities

This product will make a beeping sound as well as light emitting abilities for a long period of time until found. Keys and all components or gadgets.

Describe your product/idea.

Explain the product/idea's function(s).

List the product/idea's benefits and unique qualities.

If this is an improvement on an existing product, list the new benefit(s).

BACKGROUND INFORMATION

When did you conceive your product/idea? Feb 26th 2001

Briefly state how you first conceived this idea (work, hobby, etc.). I was Tired of always losing my keys and cell phone when I was in a hurry to go.

List those individuals to whom you have revealed your product/idea.

MY Girlfriend Bobby Jo Sweet & ISC INVENTION Submission Corporation

Have you constructed a prototype? No Has it been tested/used? ✓

I have a pager on my phone and one day my phone was left on the couch. The phone fell under the couch cushion and was lost. Luckily the base of the phone has page finder, The phone was found immediately. This I think would be a tremendous invention for everyone to use on other things as well. Keys, cell phones, purses, wallets, brief cases, remote controls, etc...

ADDITIONAL INFORMATION

Please include any additional information you feel may help us in understanding your product/idea.

This is a low cost device that would aid everyone in finding everything that's commonly lost everyday. I'm thinking not only the smaller or not as important things but things that need to be found as soon as possible. (Example) A family member is in need of help or emergency, but you can't find your keys think of how tragic this could be.

PRE-DEVELOPMENT QUESTIONNAIRE

THE STORY BEHIND YOUR INVENTION/ OTHER PERTINENT INFORMATION THAT MAY BE HELPFUL IN PROMOTING YOUR IDEA (Attach additional sheets if necessary).

In Today's busy and hectic society I see this invention as providing anyone with the ability to either see or here there Lost items, which is at sometimes vital in some situations and/or emergent.

* The following information is VITAL to the preparation of most of the items associated with your project, including your *Patent Application*. Please provide as much detail as possible. Refer to the Inventors Manual section entitled, "PRE-DEVELOPMENT QUESTIONNAIRE." ATTACH EXTRA SHEETS IF NECESSARY.

1. Sketch how your invention looks in detail. If you have a drawing or photograph, please attach it and label and name each part. State the function of each part and how it works.

Note: If an illustration was done for you by us, please check which of the following apply:

- ☒ Illustration is fine as-is. I have attached a copy of it.
- ☐ I have attached a copy of it and indicated all necessary changes.
- ☐ Refer to my sketch (below, or attached) and provide completely new drawings.

2. From start to finish, state exactly how your invention is used (as if you are writing an instruction booklet to accompany the product.)

- 1) Place Wall mounted housing unit in designated spot on wall and mount to wall.
- 2) Attach Portable assembly with Light emitting diode and speaker or buzzer to designated ~~ITEM~~ item.
- 3) push pager button to find designated item when lost.

3. In comparison to products that are currently patented or used to perform this task or fill this need that you know of, how is your invention different, better and unique? Make direct comparisons of the advantages your invention has over the others.

The first benefit is it has a speaker or buzzer to locate item as well as an LED (Light emitting diode) to locate easily. The advantage is as far as I know this item has not been marketed or produced only some indications of this product being patented, but not the same as ~~my~~ my invention with AN LED and buzzer or speaker. New technology, product last longer. The greater benefit to this invention is that this will help people feel safer with being able to find lost items a lot quicker in cases of emergencies when you are panicked most.

4. Name any other use(s) for or benefit(s) of your invention: This invention is unique in which the portable assembly unit may be attached to any accessories or gadgets in your home. This may also be attached to eye glasses for smaller assembly units.

5. What else can you disclose about your invention? I actually have done some test marketing on this product. I asked a customer at a local WAL-MART STORE about how nice it would be to be able to find lost items. I didn't disclose anything about my invention. I simply replied "Yah I know what you mean, I hate losing my keys & TV remote as well as other things I set them down and then don't know where I put them. The customer replied "Yah too bad there wasn't anything out there to help us find them."
